DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.

The applicant is arguing that Aikoh fails to disclose a content server which "searches" a content corresponding to the content information in a database, and registers the "searched" content as secondhand content. For clarification of the "searched" content, a 112 rejection is set forth as described below.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Independent claims 1 and 9 disclose the limitation "...searching a content corresponding to the content information in a database and registering the searched content as secondhand content...".

However, upon further review of the specification, it is not clear how the content server searches a content corresponding to content information and then registering the searched content as secondhand content upon a seller's request.

On page 7, lines 21-28 and page 9, lines 1-24 of the applicant's specification, the only description of searching contents is based on when a buyer wishes to buy content stored in the server. The database performs a search of the desired content the buyer wants to purchase (which is disclosed in Aikoh, 0084).

Clarification is needed for the examiner to provide a thorough examination of the present application.
